

Sugar Mover™

Controlling sugar movement for enhanced yields

SUGAR MOVER BENEFITS

- Reinforces root growth
- Increases carbon fixation and sugar movement to roots and grain
- Provides more uniform, increased sizing of grain
- Enhances overwinter survival in perennial crops
- Helps prevent spring tillering in perennial crops

MODE OF ACTION

- Converts nitrate nitrogen into more functional forms of nitrogen in the plant
- Moves sugar from leaves into the roots for improved overall plant vigor and reproductive growth
- Increases production and movement of sugars from the leaves to the seed head resulting in more uniform, larger grain

SUGAR MOVER APPLICATION

Apply 1 litre per acre at flowering before pods appear (approximately 20% flower).

Stoller products optimize plant genetic expression by helping to unleash the natural power of plants, bolstering tolerance to adverse weather, and other stresses, increasing marketable yield, and profit.

SUGAR MOVER™

Guaranteed Analysis

0-0-0

Boron (B) 8.000%

Molybdenum (Mo) 0.004%

Derived from boric acid and molybdic oxide.

Contains growth-enhancing co-factors.
