Handling: Product is stable, non-flammable and non-explosive. No special storage precautions required. If spillage occurs, recover and reuse. For disposal contact the proper governmental agency in any country except Canada. In Canada contact the Provincial Department of Environment.

Precaution: Avoid inhalation and ingestion. If inhalation occurs, move to fresh air and get medical attention. Use eye protection and NIOSH/ OSHA-approved respirator, full body clothing and gloves when handling. Prolonged contact may cause irritation of eyes, nasal passages and skin. If inhalation occurs, move to fresh air and get medical attention.

KEEP AWAY FROM CHILDREN AND ANIMALS

First Aid: If eye contact occurs, flush eyes with copious amounts of water immediately. If skin irritation occurs, wash with soap and water. In either case, if irritations continue, seek medical attention. If ingestion occurs, get medical attention.

DIRECTIONS FOR USE

To be used as a foliar application or on canola, barley, corn, legumes, oats and wheat.

RECOMMENDED USES FOR FOLIAR APPLICATION:

Apply 250-500ml per acre. Apply one time per growing season and use enough water for thorough coverage. Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself provide all the nutrients normally required by agricultural crops.

Field Crops: Alfalfa, bean crops, canola, clover, corn, cotton, forage grasses, peanut, potato, lentils, chickpeas, flax, rice, sorghum, soybean, sugar beet, sugarcane, sunflower, tobacco, and wheat/ barley/oat.

Vegetable Crops: Artichoke, asparagus, beet, carrot, cruciferous, fennel, herbs, leafy vegetables, melon, onion/garlic, cucurbits, eggplant, pepper, strawberry, sweet potato and tomato. Apply 0.5 to 1 litre per acre every 7 to 21 days.

Fruit and Nut Crops: Almond, apple, apricot, avocado, berry crops, cherry, citrus, date palm, fig, filbert, grapes, hazelnut, hops, nectarines, oil palm, olive, persimmon, peach, pear, pecan, pistachio, plums/prune, pomegranate, subtropical fruit and walnut.
Apply 0.5 to 1 litre per acre every 7 to 21 days until 10% bloom or after petals fall.

Field Grown Nursery Stock: Caneberries, strawberry, tree and vine crops and other grafted, clonal or vegetatively propagated stock plants. Apply 0.5 to 1litre per acre every 7 to 21 days.

- DROUGHT PRECONDITIONING: Apply at the recommended rate 6 days before anticipated water restrictions.
- SEED CROPS: Apply at the recommended rate prior to bud development and as needed during early reproductive stages to maintain vigor.
- POSTHARVEST: Apply at the recommended rate to perennial crops postharvest.
- STRESS MANAGEMENT: Apply at the recommended rate before, during or after the onset of stress.
