APPLICATION INSTRUCTIONS

SEED TREATMENT:

Fortified Stimulate® Yield Enhancer may be applied as a seed treatment by commercial seed treatment facilities or on-farm treating with conventional seed treating equipment which can accurately control application rates.

Fortified Stimulate® Yield Enhancer is compatible with most commercial seed treatments and inoculants. Please consult the Stoller Product Compatibility Charts, available at www.stollerenterprises.ca, or speak with your local Stoller Territory Manager before mixing.

Allow appropriate drying time before planting. Seed can be treated up to 120 days before planting.

FOLIAR:

1. Fill the cleaned spray tank 1/2 full of water and start agitation.
2. Add the required amount of Fortified Stimulate® Yield Enhancer to the tank. Ideally add Fortified Stimulate® Yield Enhancer last after other tank mix partners.
3. Continue agitation while filling the remainder of the spray tank.
4. After use, clean the spray tank according to label precautions.
5. Add surfactant if Fortified Stimulate® Yield Enhancer is not sprayed in combination with a herbicide, fungicide, &/or insecticide.

Always read and follow label directions before tank-mixing or conduct a "Jar Test" using all products in proper proportion in order to establish physical compatibility.
